

SHARESAFE RESPONSE NETWORK

One Mobile Platform Unifying Healthcare
In Alabama

CALL TO ACTION

The ShareSafe Response Network (SRN) is uniquely positioned to help Alabama respond to and manage the COVID-19 health crisis. The Alabama SRN was the first state-wide network to combine communication, virtual collaboration, knowledge dissemination and data exchange. The platform unites state and public health officials, hospitals (academic, community, public, private, rural or critical access), CEOs, clinical teams and post-acute care personnel on one secure mobile platform. The SRN is powered by Vortex, ShareSafe's hyper-secure mobile platform, connecting the State's healthcare systems to improve the lives of its citizens.

CHALLENGES TO HEALTHCARE SYSTEMS IN RESPONDING TO COVID-19 AND BEYOND

Rural and Social Inequities

No unified mobile state-wide network

Ineffective collaboration channels

Continuously changing guidelines

Lack of a system for rapidly training front-line

Navigating clinician burnout

The ShareSafe Response Network Provides:

1. Access to nationally recognized, clinically proven protocols that improve care, reducing rural and social inequities
2. An app-based digital backbone to rapidly connect the healthcare ecosystem to deploy state-wide initiatives
3. Better ways to collaborate among hospitals and healthcare facilities at the State, Regional and Local levels
4. Improved methods to swiftly review regulatory guidelines and best practices
5. A more efficient and effective way to disseminate information to and train front-line clinical staff
6. A Wellness and Well-being Community to decrease the stress and anxiety of front-line teams
7. A secure ecosystem that minimizes the risk of cyber and phishing attacks
